BENJAMIN STRATTAN, Richmond, Inda.

LI GARRETSON, Salem, Ohio.
REBECCA W. BANCROFT, 803 Shipley St., Wilmington, Del.
ARAH W. HAINES, West Chester, Pennsylvania.

OS. FORMAN, Gwynedd, Pennsylvania. EVI K. BROWN, Goshen, Lancaster Co., Pennsylvania. OBERT HATTON, Selma, Clark Co., Ohio.

AND OTHER AGENTS.

This Almanac has been transferred by the former publisher, T. ELLWOOD CHAPMAN, this Association. The calculations for the present year have been made by Dr. Jos. pulke, Buckingham, Penna. It is desirable that a "Friends' Almanac" may continue be published under the supervision of Friends, adapted to the wants of the Society. It is hoped that its circulation will be increased, and thus the Association may be abled to enlarge and improve it.

Friends' Pocket Almanac,			
Marriage Certificates by Friends' Ceremony,	also filled u	p in the nea	test manner.

OTHER BOOKS FURNISHED TO ORDER.

#### NOTES TO THE READER.

The astranomical calculations in this work, are made to true I. ock time. The effects of Refraction, according to the latest imoved Tables of Bessel, and the Equation of Time, have both been plied to the times of the Sun's rising and setting: so that the Almac, and a good Clock, will agree the year round.

II. A Time-piece may be set very nearly true by the rising, set-ng, or southing of the Sun, Moon, or Stars,—but more accurately the Sun (or the southing of the Sun, or a fixed Star), anywhere

or near the 40th degree of north latitude.

III. The time of the rising, setting, or southing of a fixed Star, ly be carried several days forward by subtracting, or backward by

ding, 4 minutes per day.

IV. The common day of 24 hours, begins at midnight, and morng (marked morn.) continues from midnight till noon; and afteron (marked aft.) continues from noon till midnight; this should remembered carefully when looking for the times of the rising, tting, or southing of the Moon or Stars soon after midnight.

## VENUS.

Venus will be Evening Star until the 23d of Second Month, then orning Star until the 13th of Twelfth Month, after which it will be ening Star the remainder of the year. It will be at its greatest illiancy on the 18th of First Month, and 31st of Third Month.

## MERCURY.

Mercury will be brightest about the 2d of Third Month, 1st of Senth Month, and 22d of Tenth Month, at which times it will likely be sible, being then in the East, just before sunrise. It will again be ightest about the 20th of First Month, 12th of Fifth Month, and 9th Ninth Month, when it will be in the West immediately after sunset.

# ECLIPSES.

In the year 1870 there will be four Eclipses of the Sun, and two of e Moon.

A Total Eclipse of the Moon, on the 17th of First Month, occur-I. ng after sunrise, consequently invisible here.

II. A Partial Eclipse of the Sun, on the 31st of First Month, invisle on this Continent; visible in the Great Southern Ocean, south of

ape Good Hope.
III. A Partial Eclipse of the Sun, on the 28th of Sixth Month, insible in America; visible in Australia and the South Pacific Ocean. IV. A Total Eclipse of the Moon, on the 12th of Seventh Month; e last contact with the Earth's shadow occurs just before sunset, nsequently invisible.

V. A Partial Eclipse of the Sun on the 27th of Seventh Month; insible in the United States, visible in the North Polar Regions.

VI. A Total Eclipse of the Sun on the 22d of Twelfth Month; insible in the United States. The line of Central and Total Eclipse begins in latitude 56° 11′ N., and longitude 43° 45′ W., passes soutle easterly across the Atlantic Ocean, touches the Southern part of Spai and the Northern part of Africa, then north-eastwardly through the Mediterranean Sea and Turkey, and ends in latitude 48° 3′ N., an longitude 40° 55′ E.

# RISING SETTING AND SOUTHING OF THE PLANETS.

It should be observed, that these are not sensibly affected by the longitude of a place. When the hour is less than six, it is in the morning; when greater than six, it is in the evening, except Venus rises Twelfth Month 1st, after six o'clock in the morning.

25

On one occasion he, with 43 several other Friends, went on board a ship about to sail for England, two or more of whom were about to embark on a religious visit to that country, and were looking for a suitable ves-After going round sel. finding comfortable accommodations, they all sat down in quietness in the cabin, to endeavor to come to a right decision in relation to taking passage in her.

The silence was broken by one, who said "he could see no objection;" another thought the ship a good one, &c., and for a time it appeared that a favorable decision might be come to. at length Arthur Howell, who had not previously spoken, put out his cane, and with motions as if he were writing with it, said, "If I had a piece of chalk I would write on this cabin floor, 18

27 m 27

One morning he told one of his sons to get his chaise, saying he was going in the coun-When seated, the son try. 24 asked which direction, which 20 Arthur told him, but could give no particular destination. When they reached Germantown Meeting, the son supposed he was to turn in, but was told to "drive on." After awhile they overa funeral, when Arthur took said, "join that funeral," which 56 they did. After the last rites 50 were performed, and the minister had finished his service, Arthur stepped forward, and in 25 his impressive manner said, 2 1 14 "that he was commissioned to

rises.

man of Samaria, 'all things that ever I did,' but he did not leave me comfortless. I turned about and went home, and soon after had good reason to believe that if I had bought the farm, it would have been the ruin of myself and young family."

# CURE OF HYDROPHOBIA.

Medical science seems vainly to have exhausted its skill in search of a cure for the bite of a 46 27 mad dog. The following is Mrs. Goodman's celebrated remedy, which has been unfailing in every case where taken before the occurrence of spasms. It consists of three doses of Elecampane 39 root, prepared and taken in the 24 following manner: For the first dose, take one and a half ounces 8 37 10 49 of either the dried or green root; 3011 if the green root is used, grate it 54 like you would horseradish; if 39 the dry root, grind it in a coffee 14 3 2 51 or spice mill, mix it in a pint of

#### THEFRIEND AND THE ROBBER.

The conduct of some of our Society, who have "fallen among thieves," but who were of course precluded from retaliating violence, even in their own defence, affords an exemplification of this feature in the Christian character.

It is recorded of Robert Barclay (see p. 65, Vol. II), that as he was on a journey, his life was in danger from the attack of a highwayman. When the robber presented his pistol, Barclay calmly asked him how he came to be so rude, and took him by the arm; on which the robber let the pistol drop, and offered 8 12 20 him no further violence.

> Leonard Fell, when travelling alone, was attacked by a highwayman, who demanded money, which he gave him; then he desired to have his 71

William Penn, during his first visit to America, founded the City of Philadelphia. In a letter to those he was leaving behind, but written after embarking in the ship which brought him home, whilst in the Delaware, he thus apostrophized the young city: "And thou, Philadelphia! the virgin settlement of this Province, named before thou wert born, what love, what care, what service, and what travail there has been, to bring thee forth and preserve thee from such as would abuse and defile thee! My soul prays to God for thee, that thou mayest stand in the day of trial, that thy children may be blest of the Lord, and thy people saved by His power.—From the Fells of Swarthmore Hall.

Is happy everywhere."

Pennsylvania and New Jersey, was held at Burlington, in the house of Thomas Gardiner, the 31st of Sixth Month, 1681. the Yearly Meeting in 1682, it was "advised, that male and female, both young and old, who make mention of the name of the Lord, may all take heed that they be not found in wearing superfluity of apparel, and immoderate or unseemly taking of tobacco. Also, selling of needless things, whereby any may take occasion of offence justly; but that we all may be found to be kept within the bounds of moderation, and within the bounds of the Spirit of Truth, and may be known to be governed by the truth in all concerns; so shall we be to the glory of God, and the comfort one of another."-Friend's Miscellany, Vol. I.

# · LORD BROUGHAM ON WAR.

principles, I know not er they agree with yours; may be derided, they may nfashionable, but I hope re spreading far and wide. rinciples are contained in ords which Lord Falkland to express in secret, and I now express in pub-Peace, PEACE!

I abominate war as unchris-I hold it the greatest of I deem it to human crimes. include all others - violence, blood, rapine, fraud, everything which can deform the character, alter the nature, and debase the name of man.

There are some races more cultured, and advanced, ennobled by education, than others; but there are no races nobler than others. All are equally destined for freedom.-Humboldt's Cosmos.

## CIRCULAR MEETINGS.

### FISHING CREEK HALF-YEARLY MEETING.

Note.—We might here state, as the information was received too late to insert in proper place, that the meeting for worship at Berion has been laid down. A meeting for worship is held at Williamsport, Pa., on 1st day morning, but not officially set up.

Clerks of the various Yearly, Quarterly, and Monthly Meetings, would confer a favor by transmitting any alterations in the time or places of holding meetings within their limits, to Joseph M. Truman, Jr., 717 Willow street, Philadelphia, Treasurer of Friends' Publication Association.

## TOBACCO.

Medical writers, without exception, describe tobacco as a poison. It owes its poisonous nature to a substance called *Nicotia*, which is extracted from it in the form of a liquid, by chemical processes. Nicotia is capable of producing death sooner than any other poison except prussic acid. The time required to accomplish this result is from two to five minutes.

One drop of it killed a rabbit in three and a half minutes. The thirty-second part of a grain produced in several individuals who tried the experiment, burning of the mouth,

throat and stomach.

In persons the sixteenth of a grain brought on spasms; and

the effects were felt for three days.

Dogs to whom tobacco is freely administered, die in spasms, and their blood is found after death not to be coagulated. The same condition of blood exists after death from most other poisons, and from lightning. On the other hand,

healthy blood always coagulates on cooling.

When tobacco is taken into the mouth, the nicotia is absorbed by the lining membrane, and earried into the blood. There it circulates throughout the body, and comes in direct contact with the brain and every other organ. In this way it produces in persons not accustomed to it, nausea, vomiting, prostration and faintness.

When tobaceo is smoked in the eigar and pipe, the poisonous principle enters the smoke, and is earried into the blood in the same manner by being absorbed in the mouth and lungs. Birds and frogs confined in tobacco smoke are killed by it. Every person who respires the smoke of a eigar or pipe, willingly or unwillingly, must have the blood in his

veins more or less impregnated with the poison nieotia. Tobaeeo is absorbed in like manner by the skin. If a eigar be unrolled and moistened, and then applied over the stomach of a child, it will soon bring on sickness and vomiting, and may endanger life. Children have been killed by its application to-the head, in diseases of the sealp, and also by injecting the infusion into the bowels. Soldiers have been known to apply it in their arm-pit so as to cause sickness, that they might escape from duty. In short, tobaceo in all forms is regarded by physicians as too dangerous for common use as a medicine, and it is employed only in lockjaw and a few other extreme disorders.—Dr. Henry Gibbons' Prize Essay.

## CARBOLATE OF LIME.

Among the most valuable of recent discoveries in chemistry, is that of the disinfecting and curative properties of carbolic acid and its combinations, particularly when united with lime in the form of carbolate of lime. It is an entirely different substance from carbonate. Carbolate of lime is probably the most effective substance for all ordinary disinfecting purposes now known. It is a preparation of carbolic acid, one of the many productions of coal tar. When rightly prepared it is in the form of a very pretty pink powder, with a strong odor-to many persons pleasant-of coal tar. A very small portion, say a teaspoonful or so, will destroy almost at once the effluvia of a privy, a little sprinkled round the barrel of garbage will remove its smell, the box or paper left open in a sick room will sweeten the atmosphere in a very short time. A gentleman in New York had occasion to recommend its use to a family living in a very small house, while one of its members nearly gone under the spread of a terrific cancer extending over an immense surface, and in its worst stage. The horrible odor filled the whole house, when he sent a package there. On his next call there was not a trace of effluvia, and the thanks of the family were given with almost tears of gratitude. With very great delicacy the nurse dusted through a gauze bag the powder around the patient's bcd-clothes, and the sufferer inexpressibly relieved from what to her was perhaps the thing hardest to bear, because conscious that it made her a burden to others, died after a while never knowing to what she owed the comfort. simple carbolic acid, diluted with water, also possesses powerful disinfecting qualities.—Bucks County Intelligencer.

A FRIEND in Philadelphia, by request, has kindly furnished the following valuable recipe for this Almanac. It has been tried by many persons with very gratifying results:

For Sore Shoulders and Backs, and other Sores on Horses and Cattle.

A weak solution of carbolic acid—say one drachm carbolic acid to one quart of water, shake it well to thoroughly dissolve and mix the acid. Apply this weak solution to the sore three or five times a day until cured.

A similar dilution of carbolic acid and water, is a most valuable wash for a cancer or other bad sore on a person, when properly diluted. Each application relieves the pain and purifies the sores, removing the smell, disinfecting it. Apply with linen rag three or four times a day.

In a second paper upon The Old Slate-roof House, is "a wonderful letter" from William Penn to the Duke of Ormond, written in 1683, when his Grace was Viceroy of Ireland. The original is in the Caste Collection, in the Bodleian Library, Oxford, and is an earnest plea in favor of toleration

in matters of religious belief. Penn says:

"Of all that falls under thy administration, in the love of God and the sincere affection of a Friend, lett me prevale with thee to avoide troubling conscientious and quiet liveing dissenters; they are best for the country and not ye worst for ye church, since if religion be at heart in our great churchmen, they will love the example of such vertue, and make it a spurr to mend the pace of thos yt they conceive of sounder

principles in their own communion."

"For my part, I franckly declare yt I cannot think yt God will damn any man for the errors of his judgment, and God forbid that we should think yt all or ye most part of ye world err willingly in understanding; and if both be allow'd, ye conclusion is short, that there are but two churches in the world and they contain all ye good and bad people in it; of which Christ and Satan are the Heads. Soe that damnation and salvation goe not by names, but natures and qualifications, according to ye unquestionable doctrine of St. Peter and St. Paul, yt God is no respecter of persons, but those yt in all nations feare him and work righteousness shall be accepted."

"Men must reap wt they sow, and his servants people are, whom they obey. Thus Xt. overthrew ye Jews' great pretensions to Abraham, Moses, ye prophets, the Law, Temple, and Rites—if you commit sinn, you are ye servants of sin—slighting their conceitts of heirship and sonship by succession and peculiar tradition, a snare too powerful upon a great

part of the world."

"Lett then the tares grow with ye wheat, errors of judgmt remain till removed by ye powr of light and conviction. A Religion without it is inhuman, since reason only makes humanity. Should men supersede that, to be conformists, which makes them essentially better than beasts, to witt, understanding? To conclude men by authority is coercive, to conclude by conviction is manly and Christian."

Penn's plea was wholly disinterested, as well as politic and humane, for he adds:

"I plead against my interests, for ye severities of those parts encrease the plantation and improvement of these. But I am for ye just and mercifull thing, whoever getts or looses by it—as ought all men of truth, honor and conscience to be."—Selected.

"The sun does not shine for a few trees and flowers, but for the wide-world's joy. The lonely pine upon the mountain top waves its sombre boughs, and cries: 'Thou art my sun.' And the little meadow violet lifts its eup of blue, and whispers with its perfumed breath: 'Thou art my sun.' And the grain in a thousand fields rustles in the wind, and makes answer: 'Thou art my sun.' And so God sits effulgent in the heavens not for a favored few, but for the universe of life, and there is no ereature so poor or low that he may not look up with child-like confidence, and say: 'My Father.'"

Richard Reynolds, so far from being inflated with the pride of wealth, said to a Friend who applied to him with a ease of distress: "My talent is the meanest of all talents—a little sordid dust; but the man in the parable, who had but one talent, was accountable; and for the talent that I possess, humble as it is, I am also accountable to the great Lord of all."

Plutarch ranks silence amongst the virtues; he calls it "a something profound and mystical." He says, that "Silence is a rarer and more divine gift than speech," and adds, "for which reason I think it is we have men as professors of the art of speaking; but as patrons of silence we have gods." "That which has been reserved in silence is yet to speak, but that which has been spoken can never be restored to silence."

# AGRICULTURE IN PRUSSIA.

The false shame which actuates many of the young men of the present day, concerning farming and country occupations, receives an emphatic rebuke when we consider the interest taken in agricultural pursuits by the higher classes of Prussia.

"M. Emile de Laveleye has just contributed an article to the Revue des Deux Mondes, in which an interesting account is given of the progress made by Prussia during 50 years of peace. Writing on agriculture, he points out that nearly all the land-owners cultivate their own estates; except for detached portions, renting is the exception. They are, therefore, retained in the country by the care of their own interests; for nothing more imperiously requires the eye of a master than rural industry. It is true they are aided by a class of employés who are not found in any other country. They are educated young men, belonging to families in a good position, often just leaving an agricultural college, who remain for a certain time on some large estate, to initiate themselves in the practical direction of one of their own. This novitiate is an ancient custom, still preserved in many trades. Thus, frequently, the son of a rich hotel-keeper will not hesitate to enter another hotel as butler or waiter, to be initiated into all the details of the service over which he will one day have to preside. When any one visits the farms, he is astonished to see, as superintendents, the son of a banker, a baron, or a rich land-owner. These young people drive a cart, or guide the plow. At noon they return, groom their horses, and then go and dress themselves, and dine at the owner's table, to whom they are not inferior, either in instruction, birth, or manners. After the meal, they resume their working-dress, and return, without any false shame, to their rustic occupation. France—in England, especially—a young man of the upper class would believe his dignity compromised in performing the work of a farm-laborer."

Thus feudal Prussia sets an example suited to the democratic society of the United States, but of a more illustrious character; and its influence should have here a wide and per-

manent effect.—Selected.

## THISTLES IN THE HEART.

Bad habits are the *thistles* in the heart, and every indulgence of them is a seed from which will spring a new crop of weeds. A few years ago a little boy told his *first false-hood*.

It was a little solitary thistle seed, and no eye but God's saw him as he planted it in the mellow soil of his heart. But it sprung up. O how quickly! and in a little time another and another seed dropped from it to the ground, each in its turn bearing more seeds and more thistles. And now his heart is overgrown with this bad habit. It is as difficult for him to speak the truth as it is for the gardener to clear his land of the noxious thistle, after it has once gained a footing in the soil. "Lying lips are an abomination to the Lord, but they that deal truly are his delight."—(British) Children's Friend.

THEODORE PARKER, late of Boston, relates an incident of his childhood connected with his mother, which he remem-

bered through life.

"A little boy in petticoats, in my fourth year, my father sent me from the field, home. A spotted tortoise at the foot of a rhodora, caught my sight, and I raised a stick to strike it, when a voice within, said, 'it is wrong.' I stood with lifted stick at the new emotion, till rhodora and tortoise vanished from my sight. I hastened home, and asked my mother what it was that told me it was wrong. Wiping a tear with her apron, and taking me in her arms, she said: 'some men call it conscience, but I prefer to call it the voice of God in tho soul of man. If you listen to it and obey it, then will it speak clearer and clearer, and always guide you right; but if you turn a deaf ear, or disobey, then it will fade out little by little, and leave you in the dark without a Guide.'"

There are two kinds of contention—the one by argument, the other by violence; the one belongs to man, the other properly to the brutes.—Cicero.

Pittacus said, "Forgiveness is better than revenge, for

that belongs to a benevolent nature, this to a savage."

# CANADA FRIENDS.

About 1792, several families of Friends settled in Canada; a committee of Philadelphia Yearly Meeting was appointed in 1797 to visit them, and another committee in 1799, when a monthly meeting was established, to be held at Pelham and Black Creek. Friends of Yonge St. were afterwards connected with them. For a few years Pelham Monthly Meeting sent answers and queries to Philadelphia Yearly Meeting direct.

They once forwarded a proposition for a Yearly Meeting among themselves, but New York Yearly Meeting having extended care towards some of their members, who had established meetings near Kingston—the two Yearly Meetings agreed that all should be united with New York Yearly Meeting. In Kimber's Almanac, 1805, only 3 meetings are given; in 1821, there were 4 monthly and 17 particular meetings.—Friend's Miscellany.

During one of the annual assemblies of Friends in Philadelphia, when the meeting was engaged on the subject of slavery, as it related to its own members, some of whom had not then wholly relinquished the practice of keeping negroes in bondage, a difference of sentiment was manifested as to the course which ought to be pursued. For a moment it appeared doubtful which opinion would preponderate. At this critical juncture, Benezet left his seat, which was in an obscure part of the house, and presented himself weeping, at an elevated door, in the presence of the whole congregation, whom he thus addressed: "Ethiopia shall soon stretch out her hands unto God." He said no more; under the solemn impression which succeeded this emphatic quotation, the proposed measure received the united sanction of the assembly.

During the time of George Fox's imprisonment in Launceston jail, a Friend offered himself "to be in Doomsdale dungeon in his stead." This was not allowed, being "contrary to law." Cromwell, on this occasion, asked some of his council—"which of you would do as much for me."—G. Fox's Journal.

## PRIMITIVE SIMPLICITY.

To the Woomon Ffriends of the Quarterly Meeting at Barnbury:

DEARE FFRIENDS—It so happens that none of us from Henly this year can conveniently attend the service of this meeting. These cums to let you understand that wee are in unity. Our week days meetings are duly kept up. Our Poore are taken care of.

Wee hope Truth prospers amongst us. And whear any thing is known to be a miss, care is taken for amendmt. This, with the salutation of Our Dear Loves, we remain your Ffriends in the Truth.

> JUDITH GRIMSDALE, LIDIA TOOVEY.

Henly the 24th, 4th mo., 1726.

Hippocrates wished a consultation of all the physicians in the world, that they might consult how to cure covetousness. It is now above two thousand years since he had this desire; and although thousands of divines as well as moral philosophers, have endeavored to cure it, the disease still continues.

The new dispensation is a dispensation of substances and realities, and not of types and shadows; not of outward and visible signs, but of inward and spiritual graces. God is often lost in prayers and ordinances.—Cecil.

# MINUTE.

"At a Monthly Meeting held at Falmouth, (Eng.) this 2d day of 11th month, 1673, Friends having met together in the fear of the Lord, found all things well, and in order; and so departed in love, giving God the glory, who is blessed forever."

## RELIGIOUS UNITY.

When the Lord put the different animals into the ark—ons, tigers, lambs—all agreed with each other.

If we are really in the ark, we shall also be blest with the pirit of concord. People dwell too much upon the fringes nd phylacteries of religion, instead of laying due stress upon eligion itself, and this is one reason why we do not agree as we ought.—Rowland Hill.

"If it seems to thee that thou knowest many things, and nderstandeth them well enough, know at the same time hat there are many more things of which thou art ignorant. Be not high-minded, but rather acknowledge thy gnorance."—Thomas A' Kempis.

"I know of no religion which destroys courtesy, civility nd kindness.— Wm. Penn.

"The hoary head is a erown of glory, if it be found in the way of righteousness."

"There is a discipline in the trials and sorrows of life, which mellows the hearts of the just."

"Politeness is said to be nothing; so is an air cushion, out it wonderfully softens the jolts of life."

"If wisdom's ways you wisely seek,

Five things observe with care;

Of whom you speak, to whom you speak,

And how, and when, and where."

# STRANGER'S GUIDE.

In numbering the houses in Philadelphia, 100 numbers are allowed for each square—the even numbers being on the South and West sides of the street. In this way it may readily be known how many squares a person resides from the Delaware River, and from Market Street, the latter being considered the central street of the city, running from East to West, and the houses are numbered North and South of it, according as they are located. Thus, 809 N. Eleventh, denotes 8 squares North of Market Street; and 1108 Arch Street is 11 squares from the Delaware, on Arch, between Eleventh and Twelfth Streets.

To enable strangers to find places on the leading streets running North and South, the following list of principal streets running East and West are given, with the numbers corresponding to the number of squares they are from Market Street.

# FRIENDS' PUBLICATION ASSOCIATION, PHILADELPHIA.

ORGANIZED IN THE SPRING OF 1867.

Thomas Garrigues, and Phobe W. Foulke, Clerks.

Annual Meeting will be held on 2d day Evening of Yearly Meeting Week, 5th mo. 9th, 1870, at 8 o'clock.

ARTICLE 2.—The objects of this Association are as follow:—
1st. To publish and to encourage the writing of books,
pamphlets, &c., calculated to spread a knowledge of the principles and testimonies of Friends, and suitable elementary and
miscellaneous works, and to enable Friends to procure such
books for distribution in their respective neighborhoods.

2d. To procure books not inconsistent with our religious principles, and to dispose of them by sale or gift to individuals,

schools, and libraries.

3d. To aid in extending the circulation of approved periodi-

cals.

Liberal contributions to the Funds are solicited, which may be sent to the Treasurer, Jos. M. Truman, Jr., 717 Willow street, or to the following Agents, who also keep an assortment of Friends' Books for sale.
